Participants:

- Ministry of Mining and Energy of Republic of Serbia
- State University of Novi Pazar, Novi Pazar
- companies

Welcome remarks are made by Prof. Dr Milos Banjac, assitant minister at MME of RS

After presentations, during the discussion the following issues were placed to keynote speakers;

1. Why this master program is two year program?
2. Is this master program is intended only for civil engineers and architects?
3. Attention was drawn that the adoption of the Law on Energy Efficiency in RS and its implementation will result in job creation for energy managers, specialists, etc. in the administration, public companies, companies engaged in the production of renewable energy and others.
4. It was also emphasis that all Universities in RS must recognize their interest in the establishment of the study and identification of titles.

The conclusion is

-Report from this round table addressed to the relevant ministries for education and energy, as well as to companies and public institution engaged in field of EE.

- Inform the public, especially parents and students about the importance, needs and possibilities of this study program through networking, media and others.

Rapporteur; Edin Dolićanin
